Before you begin:
- Cover working surface with a smooth placemat or plastic table cloth. Keep away from soft furnishings.

Tips for using air dry clay:
- **Knead:** Before you begin, knead the clay using the palm of your hands. This will make the clay more pliable and easier to shape. To knead a larger amount of clay, use the palm of your hands and for smaller amounts, knead with your thumb and index finger.
- **Combine:** To stick 2 pieces of clay together, simply press one piece onto another piece of clay.
- **Mix:** Combine two different colours together and knead to create new colours.
- **Dry:** Apply clay to one area at a time as clay will begin to dry within 30 minutes. Most clay projects will be completely dry within 24 hours.
- **Storage:** Open one clay bag at a time. Do not leave the clay open to the air as it will begin to dry. When not in use place inside a zip lock bag and store in a cool place away from sunlight.

How to follow the instructures:

1

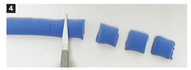
Note what colours are required to create the flower in the top left hand corner.

2

The amount of clay used is indicated by the shadowed area of the bag diagram.

3

Follow the amount of pieces indicated of each flower.

4


To help use the required amount of clay for each flower, roll the clay into a cylinder and cut into the correct amount of pieces you will need for the total amount of flowers it makes. Eg. If it is indicated that 2 flowers are made with 5 petals each, you will need to cut and roll 10 small balls of clay to achieve the required amount of petals.

5

Roll into even balls and follow the rest of the instructions.
