106x150mm（折后尺寸）

5. Assemble

Using the plastic needle, sew the vines to the top of the soil, as shown. Arrange the leaves on the top.
Line up the three ropes together. Use the petal length of the longest rope to thread through the wooden ring. Fold the rope through the ring and secure the three ropes together using a gathering wrap.
To attach the hanging ropes to the pot, use the plastic needle and sew the ends at perfect intervals around the top edge of the pot.
Now place the soil into the pot, and arrange the vines neatly, so vines hang from all sides of the hanging pot. The hanging plant is complete.

18. Front Loop Only (Abbreviated 'FLO')

You work the stitch as normal, except that you insert your hook in only the front loop of the 'V', as shown below.

19. Back Loop Only (Abbreviated 'BLO')

You work the stitch as normal, except that you insert your hook in only the back loop of the 'V', as shown below.

20. Skip (Abbreviated 'sk')

This stitch is left empty, serves to connect the front and back stitches and complete the overall effect.

21. Fasten Off (Abbreviated 'F/O')

Once you've worked your last stitch, you'll have one loop left on your hook. Cut the yarn leaving a tail approx 15cm long. Wrap the yarn around the hook and pull through the loop. Remove the hook and pull the yarn tail to tighten it up. This will create a little knot that will mean your yarn can't unravel.

22. Weave In Ends

On the wrong side of your crochet, weave the needle in and out down the back of a few stitches as shown in the picture. Weave the needle back going in an upwards direction. There are no strict rules about how best to weave in the ends of yarn – the important thing is that they need to be secure and invisible from the front.

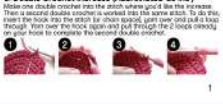
Basic Crochet Stitch Diagram

1. Magic Ring

Loop yarn around with working yarn on top. Insert crochet hook into loop. Hold working yarn. Pull another loop through hook. Pull yarn up. You now have 1 loop on the hook. Yarn over and pull the yarn through the loop on hook to chain 1

2. Chain Stitch (Abbreviated 'ch')

The chain stitch is the base for all crochet which is also called a foundation chain. The first step is to create a slip knot on your hook. Hold the tail of the yarn between your middle finger and ring finger to create a yarn over. The third step is to insert your hook back through the loop loosely on your hook, making sure to catch the working yarn. You now have made your first chain. Repeat steps 2 and 3 to make more chains. Hold the stitches you've already made in your left hand close to the hook for stability.



3. Double Crochet Increase (Abbreviated 'dc inc')

Make one double crochet into the stitch where you'd like the increase. Then a second double crochet is worked into the same stitch. To do this, insert the hook into the stitch (or chain space), yarn over and pull a loop through. Yarn over the hook again and pull through the 2 loops already on your hook to complete the second double crochet.

4. Double Crochet (Abbreviated 'dc')

Make a foundation chain to the required length. If you just want to practise, start by making about 20 chains. If you want to make a piece exactly 20 stitches wide, chain 21. Identify the second chain from your hook and then insert your hook here. Yarn over, then draw up a loop; you will now have 2 loops on your hook. Yarn over and then draw the yarn through both loops on the hook so you have 1 loop left on your hook. You have completed the stitch.

5. Double Crochet Two Stitches Together (Abbreviated 'dc2tog')

Insert your hook into the next stitch, as if to make a double crochet. Pull through a loop. Without completing the stitch, insert your hook into the next stitch as if to make another double crochet. Pull through a loop. You should now have 3 loops on your hook. Yarn over and draw the loop through all 3 loops on your hook. Having worked into 2 stitches but only created 1, you have decreased by 1.

6. Slip Stitch (Abbreviated 'sl st ss')

Make a foundation chain to the required length. For a precise number of stitches, chain that many plus an extra 1. Identify the second chain from your hook. Insert your hook into the second chain from the hook and yarn over. Pull your hook back through the chain; there should be 2 loops on your hook. Avoiding the urge to yarn over, continue to pull the yarn through the second loop on the hook – you have completed the stitch and should have 1 loop on your hook. Repeat steps 2-4 to finish the row.

7. Half Treble Crochet (Abbreviated 'htr')

Make a foundation chain to the required length, not forgetting to chain 1 more than the number of stitches you need. Identify the third chain from the hook. Make a yarn over and then insert your hook into the third chain from the hook. Yarn over, then pull through a loop. Now, there should be 3 loops on your hook. Yarn over, then pull the yarn through all 3 loops on your hook. Now, you should have 1 loop on your hook and have completed the stitch.

8. Treble Crochet (Abbreviated 'tr')

Make a foundation chain to the required length. For a precise number of stitches, chain that many plus 2. Find the 4th chain from the hook. Yarn over and insert your hook into the 4th chain from the hook. Yarn over again, then pull through the 1st loop; there should be 3 loops on your hook. Yarn over and pull the yarn through 2 of the loops on your hook, leaving 2 loops on your hook. Yarn over again and pull the yarn through the 2 remaining loops. You should now have 1 loop on your hook and have completed the stitch.

9. Double Treble Crochet (Abbreviated 'dtr')

Make a foundation chain to the required length, making sure to chain 3 more than the number of stitches you need. Identify the fifth chain from the hook. Yarn over and pull through a loop; there should be 4 loops on your hook. Yarn over, then pull the yarn through 2 of the loops on your hook. There should now be 3 loops on your hook. Yarn over, then pull the yarn through 2 of the loops on your hook. There should now be 2 loops on your hook. Yarn over, then draw the yarn through the 2 loops on your hook. There should now be 1 loop on your hook.

10. Front Post Treble Crochet (Abbreviated 'FPtr')

Yarn over, insert the hook from front to back to front around the post of the next stitch. Yarn over and draw up a loop. (Yarn over and draw through two loops) twice.

11. Cluster Stitch

Yarn over, insert the hip into the next stitch and draw up a loop. Yarn over your hook again and draw the yarn through two loops on the hook. Leave the remaining two loops on the hook. Rather than completing the treble crochet, you will yarn over your hook and insert it into the next stitch before drawing up another loop. Yarn over once more and pull through two loops on the hook. You will now have three loops left on the hook. Now repeat steps 3 and 4 twice. You will end up with five loops left on your hook and half-completed four stitches. Yarn over and draw the yarn through all five loops on the hook. This completes your cluster.

12. Popcorn Stitch

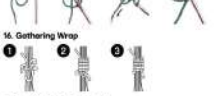
Work four treble crochets into the next stitch. Pull the yarn out a little further than usual, and remove your hook from the current stitch. Be careful not to let it unravel. Insert your hook from front to back under both loops of the top of the first treble crochet you made at the start of the popcorn stitch. Instead of pulling your working yarn over your hook as you would usually, insert the hook into the working loop and pull on this working yarn until it is the exact size around the hook. Draw the working loop through the top of the first stitch and this will complete the popcorn stitch. Some patterns will dictate that you close the popcorn stitch with a chain stitch. Check the pattern that you are using. If it doesn't mention it, just finish it here.

13. 3 Double Crochet In 1 Stitch (Abbreviated '3 dc in 1 st')

Yarn over and insert your hook into the stitch. Work the first double crochet. Yarn over and work the second double crochet stitch inserting your hook into the same stitch. Yarn over and work the third double crochet stitch inserting your hook into the same stitch.

14. Treble Crochet Increase (Abbreviated 'tr inc')

Make one treble crochet into the place where you'd like the increase. Then a second stitch is worked into the same place. Insert the hook into the stitch (or chain space) and yarn over and pull a loop through. Yarn over the hook and pull through the 2 loops already on your hook to complete the second treble crochet.



15. Slip Knot

Crochet projects most commonly start with a slip knot. Create a loop about 15cm into your yarn. Insert your hook into the yarn and pull the end attached to the yarn ball through the loop. Then pull it tight. You now have a slip knot on your hook. Now you're ready to start crocheting.

16. Gathering Wrap

17. Double Treble Crochet Increase (Abbreviated 'dtr inc')

Yarn over three times. Insert the hook into the indicated stitch or space. Yarn over and pull up a loop (you will have 5 loops on the hook). Yarn over and pull through two loops four times until only one loop remains on the hook. This completes one double treble crochet. Work another double treble crochet into the same stitch or space. You have now made a double treble crochet increase, which means two (or more) double treble crochets worked into one stitch.
