## INSTRUCTIONS

**Become an archaeologist** with your Around the World Excavation 10 in 1 dig kit. Dig through the sand stone to uncover the ancient artefacts!

### Artefacts

You will be digging and unearthing ancient artefacts from all around the globe.

### Earthen Block

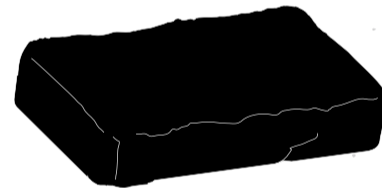

This block represents a piece of Earth from thousands of years ago. Buried inside the block are the remains of dinosaurs, great rulers, and pirates!

### Chisel

This real paleontology tool helps you dig around the artefacts.

### Dusting Brush

This brush will help you clean away all the dust and small particles left on the delicate artefacts. Be sure to brush away the dust slow and easy.

## START DIGGING!

### Step 1:

Cover your work area with newspapers or large sheets of paper and wear old clothes or a smock. Archaeology can be messy so make sure your working area is an easy to clean surface. Place your block in the middle of your work area.

### Step 2:

Using the included tools, dig away until you start to see the artefacts coming through. Dig around them and begin brushing away the dust to reveal the entire artefact. You can also use water to rinse away those hard to dig away pieces.

### Step 3:

Once the ancient treasure has been excavated, be sure to carefully rinse it with warm water.

### Step 4:

Now showcase your wonderful discoveries!
