# **USER MANUAL**

**EVAPORATIVE COOLER** KEY CODE: 43573417

# **IMPORTANT SAFETY INSTRUCTIONS**

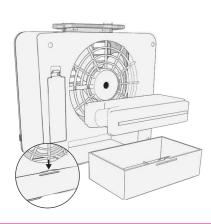

# Step 1

Shake the coolant pack before freezing. Place it flat in the freezer. When frozen, remove from the freezer and place into the coolant tray. Insert the tray into the cooler and class firm! cooler and close firmly.

Please press down the tray buckle (as shown in the lower left of the figure below) and pull out the coolant

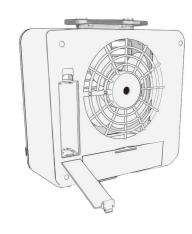

If the coolant pack is frozen for too long, it may bulge. Let it sit at room temperature until the bulge disappears before use.

# Step 2

Insert the 1200mAh Li-ion rechargeable battery (included), matching the positive and negative symbols.

DISPOSE OF OLD BATTERIES AT A BATTERY RECYCLING CENTRE.

# Step 3

When the battery power is too low (or it affects fan performance), charge the product. Insert the USB cable (included) and connect it to a power supply (DC 5V).

Red Light: Charging Green Light: Fully Charged Operation
