A List of Components:

- ❶ Candy maker base x 1
- ❷ Animal mould x 1
- ❸ Shape mould x 1
- ❹ Worm mould x 1
- ❺ Flower mould x 1
- ❻ Funnel x 1
- ❼ Tweezer x 1
- ❽ Bottles x 3

Ingredients(not included): 1 spoon of gelatin, 2 - 3 spoons of fruit juice, 1 spoon of sugar, 1/8 teaspoon of citric acid, 1/2 teaspoon of honey

Optional: All kinds of fruit juices can be used: orange juice, grape juice, apple juice, pear juice and more. Fruit syrups can also be diluted to get a similar result. For example: strawberry syrup, raspberry syrup, blackberry syrup and more.

B ADULT ASSISTANCE REQUIRED. How to make your own fruit gummies?

1. Mix the gelatin with 2-3 spoonful of fruit juice or diluted fruit syrup in a cooking pot. Let the gelatin dissolve on low heat for fifteen minutes.
2. Combine the sugar and citric acid in a bowl and add one spoonful of water and stir well until the sugar crystals are completely dissolved. Heat the gelatin mixture in a water bath until it becomes a smooth liquid. Add the honey and the citric acid mixture, then stir thoroughly to combine.
3. Let the gelatin mixture rest until the foam disappears. To save time, you can also skim off the foam with a spoon. Then, pour the liquid gelatin through a funnel with a filter into a bottle.
4. Lightly coat the inside of the moulds with a small amount of food-grade household oil. Pour the liquid mixture into the moulds.
5. After 3 to 4 hours, the gummy figures should be set and ready to remove.

Some tips for special taste: To make your fruit gummies extra sour, roll them in a mixture of citric acid and sugar. To add a coconut flavor, roll them in coconut powder.

HINT: You can also make chocolate figures with the same machine! Simply melt the chocolate using the water bath method, then pour the liquid chocolate into moulds. Let them cool and harden completely. Once set, pop the figures out of the moulds and enjoy!
