Instruction Manual

Kids Interactive Touchscreen Camera

K: 43-635-085 | T: 71-802-572
Model No: EB500470

MADE IN CHINA

Please read this user manual carefully before using the product.

Safety and Warnings

Misuse of batteries can lead them bursting, causing a fire or chemical burns. Please read the below precautions:

1. Do not disassemble.
2. Do not crush and expose the battery to shock or force. Such as hammering, dropping or stepping on it.
3. Do not short circuit.
4. Do not expose to high temperatures or place near a heat source.
5. Do not dispose of in fire.
6. Do not handle damaged or leaking battery.
7. Keep the battery out of the reach of children.
8. Keep the battery dry.
9. If you notice any signs of damage, cease use, and contact support.
10. Dispose of the item at a suitable waste station, as the battery cannot be added to normal waste.
11. Keep the rubber cover of the USB-C port closed lightly while it is not in use in order to prevent dust or water from getting into the USB-C port.
12. Keep the camera clean by wiping it with a slightly damp cloth.
13. Keep the camera out of direct sunlight and away from any heat source.
14. Do not drop the camera on a hard surface. Do not expose it to moisture or immerse it in water.
15. Keep the lens clean. If the pictures taken are blurry, it could be because there is dust or dirt on the lens. You can clean the lens by:
    Blowing on the lens.
    Gently wiping the lens with a dry cloth.
16. Charging should only be completed by an adult.

Product Overview

This product is designed to be used by children.
In addition to displaying time, you can also take photos, take videos, record voice and play games!
Please note, it is not necessary to turn off the Master Power Switch during daily use.
This product with a small amount of charge, but we recommend fully charging before use. It takes about 1.5 hours to fully charge.

Speaker
Front Camera
On/Off Button
TF Card Slot
Master Power Switch
Home Button

Note:
If the product cannot be turned on, please charge it with a 5V voltage adapter(not included) for 2–5 minutes to start up the camera.

Switch [Master power switch] to " I⬛0 " position to connect the power.

Charging the Battery

Connect the Interactive Touchscreen Camera to a computer with the included USB cable to charge the battery.

Insert the USB cable (Small end) into the USB–C port on the camera. Insert the larger end of the USB–C cable into a spare USB port on the computer. A USB port is usually marked with this symbol USB.

Once the connection is successful, you will see the battery charging symbol displayed on the camera screen for one second, and then the data transfer symbol. The battery will continuously charge whilst connected, you can open PC to find the camera to transfer data at the same time.

Monitor the camera regularly throughout the charging process. When the battery is fully charged, a full battery symbol displays on the screen, disconnect the camera from the computer.

Note:
It will take approximately 1.5 hours to fully charge the battery. The actual time depends on power supply, the remaining charge and the ambient temperature of the charging environment. The optimum ambient temperature is 0℃–40℃ (32℉–104℉). If your camera needs longer than 3 hours to fully charge, try charging from a different USB power source.

Battery Life

The time of the battery lasts between charges depends on usage. Like other electronic devices, more frequent usage will mean the battery will drain more quickly. Some activities will be more demanding on the battery, such as taking photos and videos. The expected battery life is shown below. This is based on the assumption that the screen is turned off when not in use.

Note: Please do not use fast charge, charge at least once a week.

Condition	Battery Time
Low Usage	2 weeks
Typical Usage	2~3 days
Heavy Usage	1 day

Low Battery Reminder

There will be a reminder when the battery is below 30%, and you will not be able to play games when the battery is below 10%.

How to Operate Interactive Touchscreen Camera

Press the On/Off button (on the left side) for 3 seconds to wake up the camera from standby.
When the clock is displayed on screen, press the home button to go to the home menu.
If the battery level is too low and cannot keep the clock running, you will need to enter the time and date again after recharging.
When the battery level is low, only the clock display function is available. We recommend recharging the battery as soon as possible before further use.

Screen Savers

The screen savers time can be set by 10 sec, 30 sec, 1 minute and off. After setting the screen savers time, the screen brightness will dim when the set time is reached to save battery power.
In addition to setting the screen saver, there are the following two default ways to save power: On the home menu page, if there is no operation for one minute, it will return to the clock display page; and in the camera mode, if there is no operation for 3 minutes, the screen brightness will dim.
If you have a countdown, it will return to the clock display and will not shut off auto when the countdown is running and finish.

Clock Display Background

Press the home button to switch the home menu and clock display. When the clock is displayed, tap the left or right side of the screen to change the clock display background.

Trouble Shooting

Please check the trouble shooting steps outlined below, and if you still have any issues, contact supplier for support.

Problem	Solution
The camera is not turning on	Hold the On/Off button for 3 seconds to turn off, then hold the On/Off button again to turn back on.
The camera is not charging	• Try to charge the camera with a different USB cable. • Check if the computer's USB port or adapter you are using to charge the device (not supplied) is working with other electronic devices. • If still not working, perform the hard reset method as described above.
Screen display is abnormal	Hold the On/Off button for 3 seconds to turn off, then wait 30 seconds. Hold the On/Off button again turn back on.
Cannot connect to computer	Check the connections on the USB cable between the camera and the computer, Ensure the cable is securely connected at both ends. Hold the On/Off button for 3 seconds to turn off. Then wait 30 seconds. Hold the On/Off button again turn back on. Unplug from the computer and reconnect.
Image taken is not clear	Make sure the lighting conditions of the shooting environment are good. Check to see if the camera lens are clean. If you find some dust or dirt on it, please try blowing on the lens, and gently wiping the lens with a dry cloth.

Not enough memory/ storage space	If you have run out of memory, you will need to delete some of your files. These may include photos, videos, voice recording, and music files. You transfer these to your computer before deleting from the camera.
