## Guide

## Tool Required (Not included)

1. Tweezers: for small parts

2. Scissors

3. Ruler

4. Glue

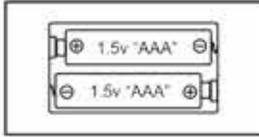

Using glue (The glue is not included and needs to be purchased separately by the consumer.)  
Note: Using craft glue is recommended

### Inserting batteries

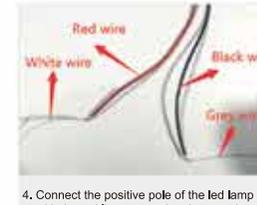

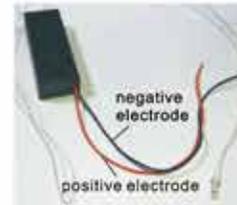

1. Unscrew to open battery cover.

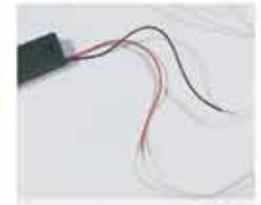

2. Insert 2 x 1.5V AAA batteries.

3. Replace battery cover.

4. Connect the positive pole of the led lamp with the red line connecting the negative pole of the battery box and the black line (Connect the corresponding positive and negative poles).

5. This is how the battery box and LED bulb wire connection look when completed.

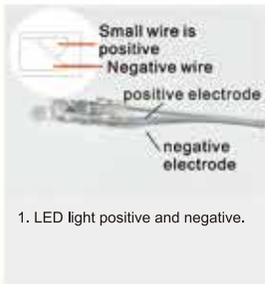

6. Open the battery compartment switch and test.

7. Finally, attach all the wire connections to the sticker to prevent short circuiting.

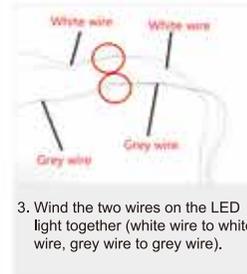

### Battery extension cord mounting method

1. LED light positive and negative.

2. Scrape the rubber edge on both sides of the cut wire to expose the wire about 0.5-1cm.

3. Wind the two wires on the LED light together (white wire to white wire, grey wire to grey wire).

### Paper paste method

1. Remove the bottom plate and paper accessories  
Tools: glue, ruler, brush (not included).

2. Apply glue on the bottom plate, as shown. Apply glue evenly with a brush.

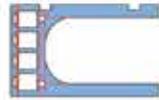

3. Align the bottom plate and firmly press the paper. Adjust its position before it dries out.
