### How to braid threads:

#### Tie a knot

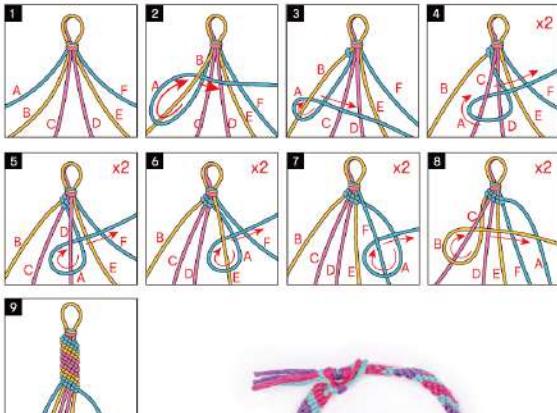

Fold threads in half and tie with a small loop at the head. The number of threads can be adjusted according to the knitting needs.

2. Cross threads B over threads A. Cross threads D over threads C.
3. Cross threads D over threads A. Cross threads D over threads B.
4. Cross threads C over threads A.
5. Repeat steps 2-4 to complete the base braid.
6. Braid all threads to a suitable length. Tie a knot at the end.
7. Add letters at an appropriate position in the middle of the braided rope.

#### Braiding method 2:

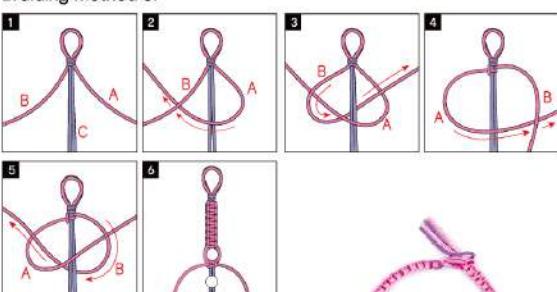

1. Tie a knot with three threads, separate the threads based on colour symmetrically.
2. Tie the thread A from the top right corner of the thread B.
3. Tie the second knot on the thread B with thread A in the same way.
- 4-7. Tie the same two knots on the other threads from left to right with thread A. Then keep the thread A on the right.
8. Start a new round of knotting from left to right with thread B.
9. Repeat the process until the bracelet is the length that wraps loosely around your wrist and tie a knot at the end. Cut the rest off. (scissors not included)
