2

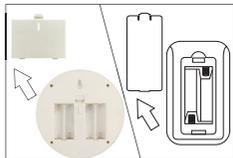

Tips for Battery

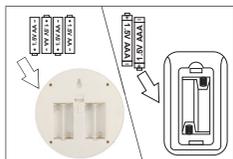

1. Please prepare 4 good-quality AA batteries and 2 good-quality AAA batteries; otherwise, it will affect the brightness and usage time.
2. Press the "W" button to check if LED bulbs are showing white light. If any bulb appears dimmer, it indicates that the batteries are low. Low battery power will reduce the sensitivity of the remote control. Please replace them with new batteries.
3. If you do not plan to use the device for a long time, please remove the batteries. This will help save power and protect the lights.

3

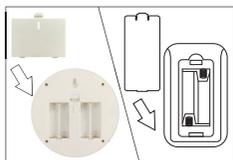

Battery Installation

1. Open the Battery Compartment.

2. Install the Batteries. Insert each battery with the positive end (marked "+") aligned with the positive terminal (+) in the compartment, and the negative end (marked "-") aligned with the negative terminal(-)

3. Close the Battery Compartment Cover.

4

Tips for Remote Control

Keep the remote dry, as it is not waterproof. Water may cause it to stop working.

Operating Manual

1. You can turn the light on by press the top button switch, default in white light, press the top button switch 3 times to cycle through red, green, and blue light, press the top button switch a fourth time to enter colour changing mode, press the top button switch again to turn off the light.
2. Peel off the magic tape's adhesive backing. Stick one side to the light and the other to a smooth, clean surface, then press firmly for 30 seconds to secure. Alternatively, hang the light directly on a hook (Not included). Align the light with the magic tape on the mounting surface to fasten. For better adhesion, let it set for 24 hours before use.

5
