Tips

- > Make sure to protect furniture and clothing before you start painting. Use the disposable table cover to protect the table, and wear the supplied aprons.
- > When proceeding to paint with the next colour, thoroughly clean the brush to avoid mixing different colours and creating inaccurate shades.

How To Paint A Palm Oasis On Canvas

1

Use the flat brush to paint the outer background area in light orange. Then, use the finer brush to paint the inner arched window in the same colour.

2

Mix white with a small amount of flesh colour to create a cream shade. Then, fill the outermost ring of the arched window with the cream colour.

3

Use the flat brush to paint the sky and beach areas inside the arch with flesh colour. Mix a little white with flesh colour to make a lighter shade, then lightly dab it onto the sky to add depth and variation.

4

Paint the ocean area blue. Mix a little white with blue to create a lighter shade, and brush it onto parts of the ocean to add depth and detail. Paint the distant mountains in orange.

5

Use the paint brush to paint the palm tree trunks brown.

6

Mix a small amount of white with brown to create a slightly lighter shade. Use this colour to depict the natural horizontal grain on the palm tree trunk.

7

Use green and orange to paint the palm fronds.

8

Using the orange, dark orange and green, paint a few small plants along the bottom inside of the arch.

9

Mix green with a small amount of brown to create a darker green. Paint veins on the small plants to add detail.

10

Finally, use dark orange to paint a decorative border of small squares inside the outermost cream arch.
