**IMPORTANT! PLEASE READ CAREFULLY BEFORE USE AND
KEEP FOR FUTURE REFERENCE.**

Safety Notes

CAUTION:

Read these instructions carefully before assembly and use and keep for future reference.

The child may be hurt if you do not follow these instructions.

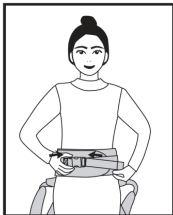

WARNING: Keep away from fire!

- › The Baby Carrier & Hip Seat is designed to carry a baby from 5 months and maximum 15kg.
- › Read and follow all warnings and instructions before using this baby carrier.
- › Never leave your child unattended inside the baby carrier.
- › When using the carrier, monitor your child.
- › Child must face towards you until he/she can hold head upright (approximately 5 months old).
- › Hold your baby closely at all times until all the buckles are correctly attached.
- › Ensure baby is properly positioned with legs straddling the baby pouch and both arms extended through the armholes.
- › Check that all buckles and adjustments are secured before each use.
- › Take care when bending or leaning forward or sideways. Ensure that you are holding your child safely in your arms.
- › Always ensure there is enough room around your baby's nose and mouth to provide a clear source of air.
- › Never lay down with baby in the baby carrier.

Safety Notes

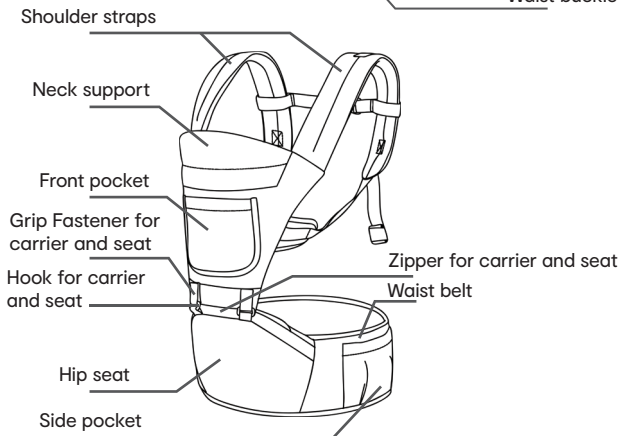

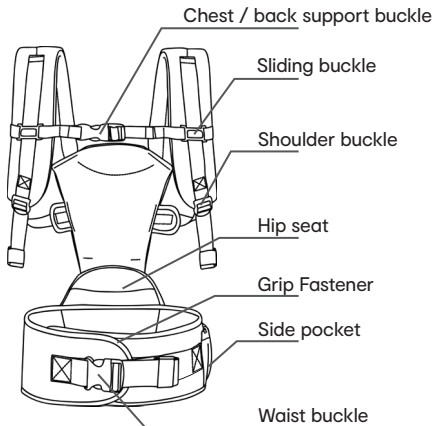

- › Child must be able to sit upright unassisted to use the backpack position (approximately 6 months old).
- › Child must face forward, towards the caregiver in the backpack position.
- › This carrier is not suitable for use during sporting activities.
- › Inspect the baby carrier for any signs of wear and tear.
- › Do not use this baby carrier if any parts are torn, damaged or missing.
- › Your balance may be adversely affected by your movement or that of your child.
- › For low birth weight babies and children with medical conditions, please seek advice from a health professional before using the product.
- › Keep the baby and user away from heat sources and hot drinks.
- › Ensure your child's chin is not resting on their chest, as this may restrict breathing and lead to suffocation.
- › The carer should be aware of the increased risk of your child falling out of the carrier as it becomes more active.
- › Never let child sleep while in the outward facing position.
- › The carrier, wrap or sling should be tight enough to hug your baby close to you. Ensure your baby is positioned high and upright with head support. Any loose fabric may cause your baby to slump down, restricting breathing.
- › Always be able to see your baby's face by simply looking down. Ensure your baby's face, nose and mouth remain uncovered by the carrier, wrap or sling and/or your body.
- › Your baby should be close enough to your chin. When tipping your head forward you can easily kiss your baby on top of their head.
- › Keep chin off chest: Ensure your baby's chin is up and away from its body. Your baby should never be curled so that its chin is forced onto its chest as this can restrict breathing. Regularly check your baby. Babies can be in distress without making any noise or movement.
- › Your baby's back should be well supported in a natural position.
- › Keep this sling away from children when it is not in use.

- › Wear the waist belt high on the waist.

- › Child legs should be in the M position with the knees higher than the hips.

Parts List

Instructions for Use

Notes:

- › Before using the carrier for the first time, practice the setup without your baby or ask someone to assist you.
- › Always secure your baby with a supporting hand at all times while buckling or tightening the carrier to your body.
- › If possible, use a mirror to make final adjustments to your carrier and/or child for a snug fit. Your baby should not be loose in the carrier nor too tight to obstruct breathing.

Independent Hip Seat (Facing in/out)

Minimum age: 5 Months

Maximum weight: 15KG

1. Place the waist belt around your waist with the hip seat at your back.
2. Attach grip fasteners of the waist belt and fasten the buckle around your waist.
3. Turn the hip seat to the front or side position.
4. Sit down and hold your baby comfortably facing out or in on the hip seat whilst using your hands to support baby's chest or back at all times.

5

6

Front Carrying Position (Facing In)

Minimum age: 5 Months

Maximum weight: 15KG

1. Place the waist belt around your waist with the main body of the carrier at your back.
2. Attach grip fasteners of the waist belt and fasten the buckle around your waist.
3. Turn the main body of the carrier to the front.

1

2

3

4. Sit down on a soft surface, e.g. a chair or bed and place the carrier flat on your laps.
5. Carefully slide your baby into the carrier facing in with both legs through its own leg opening.

Note: Ensure that your baby straddles snugly in the carrier's seat and each of baby's legs is securely in its own leg opening.

6. With your left hand holding your baby, place the shoulder strap over your shoulder with the other hand.

4

5

6

Front Carrying Position (Facing In) continued

7. With your right hand holding your baby, place the shoulder strap over your shoulder with the other hand.

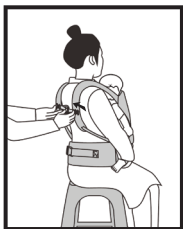

Note: Ensure your baby's arms are through the arm holes.

8. Ask a second person to fasten the chest/back support buckle.
9. Stand up and then make adjustments for snugness.

Note: Before releasing your hold of the baby, ensure that all buckles are securely fastened.

7

8

9

10

Front Carrying Position (Facing Out)

Minimum age: 5 Months

Maximum weight: 15KG

1. Place the waist belt around your waist with the main body of the carrier at your back.
2. Attach grip fasteners of the waist belt and fasten the waist belt buckle around your waist.
3. Turn the main body of the carrier to the front.

1

2

3

4. Sit down on a soft surface, e.g. a chair or bed and place the carrier flat on your laps.
5. Carefully slide your baby into the carrier facing out with both legs through its own leg opening.

Note: Ensure that your baby straddles snugly in the carrier's seat and each of baby's legs is securely in its own leg opening.

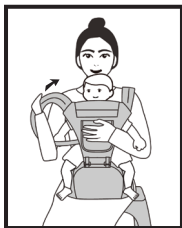

6. With your left hand holding your baby, place the shoulder strap over your shoulder with the other hand.

4

5

6

Front Carrying Position (Facing Out) continued

7. With your right hand holding your baby, place the shoulder strap over your shoulder with the other hand.

Note: Ensure your baby's arms are through the arm holes.

Note: For smaller babies, fold down the neck support until baby's face is not covered.

8. Ask a second person to fasten the chest/back support buckle.
9. Stand up and then make adjustments for snugness.

Note: Before releasing your hold of the baby, ensure that all buckles are securely fastened.

9

10

Back Carrying Position

Minimum age: 6 Months

Maximum weight: 15KG

1. Place the waist belt around your waist with the carrier's seat at your back.
 2. Attach grip fasteners of the waist belt and fasten the buckle around your waist.
 3. Sit down on a soft surface, e.g. a chair or bed.
 4. Ask a second person to place your baby straddling on the carrier's seat while you support your baby with two hands.
 5. While supporting your baby closely with both hands, ask the second person to place both the shoulder straps over your shoulders.
- Note:** Ensure that your baby straddles snugly in the carrier's seat and each of baby's legs is securely in its own leg opening.
6. While the second person holds your baby with two hands, fasten the chest/back support buckle by yourself.
