1 Remove the protective film from the wax square, and stick wax on the tip of the applicator pen.

2 Pick up the gems with the point drill pen.

3 Apply glue to the surface of the vinyl figurine.

4 Brush the glue evenly on the surface, then wait for about 15-30 seconds.

5 Place the gems on the vinyl figurine in the correct colour coded position.

6 Place the gems by colour area.

Completed!

Tips:

1. If the gem sticks to the applicator pen and can not be released, clean the pen tip with water.
2. If the glue on the brush tip dries, soak the bristles in warm water for approximately 30 minutes to help dissolve the residue. Then, gently comb the bristles with your fingers and rinse until clean.
3. Spread the glue in a thin, even layer.

The glue should not be thick or uneven.
