3 HOW TO CREATE A BEADED POT PLANT

- Place the foam into the flower pot.
- Fill the artificial moss turf to the pot opening.
- Insert the metal wire into the center and push it deep into the foam so it stays in place.

1. Layer 1 (shorter layer)
2. Layer 2 (taller layer)

3. Make final adjustments by changing the angles and heights of the leaves. Ensure the leaves face forward and the lengths vary naturally.

2 HOW TO STRING BEADS

COMPILATION 1

- Take a 70cm length of metal wire, bend 1cm short than those it through bead A.
- Twist the wires slightly at the top of the beads.
- Twist the wires together until the starting parts are reduced to the same length as the beads.
- External the right wire to adjust the length of beads. Pull forward through the beads and fasten beads.
- Tighten the side branches.
- Repeat the above steps to hold the left side.

COMPILATION 2

- Cut a suitable length of metal wire and cut one end into a small loop.
- String the beads in order, leaving about 1cm of wire at the end.
- Bend the end to secure the beads and prevent them from sliding off.

Create the required beaded strands with 5-8cm of wire left at the end of each strand.
