Assembly Instruction

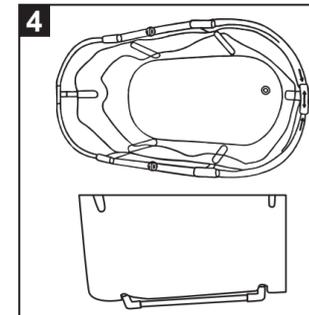

Install all 6 x T shape interface to the 4 x single-headed snap support rod and 2 x single-headed snap with black base support rod in turn. (2 x single-headed snap with black base support rod connect with 2 x T shape with arrow marks)

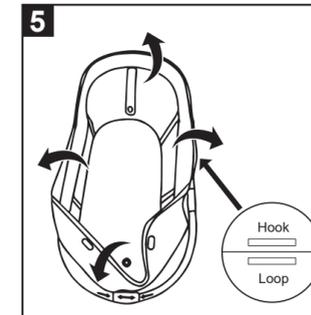

Insert all step 1 six support rods into the support rod holes, and 2 x T shape with arrow marks support rod are at the two ends of the bathtub, and others are in the middle of the bathtub in sequence as shown in the figure.

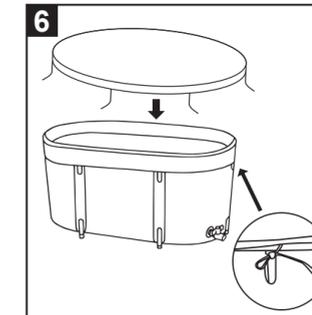

Find the four elbow pipes and connect them to the all T shape interface in sequence.
Note: four elbow pipes' arrows all point towards the T-shaped pipe as shown in the figure

Find the 2 x double-headed snap support rod and connect with the other 4 x T shape interface, and find 2 x no snap support rods, and connected to the bottom L-shaped interface on both sides in turn as shown in the picture.

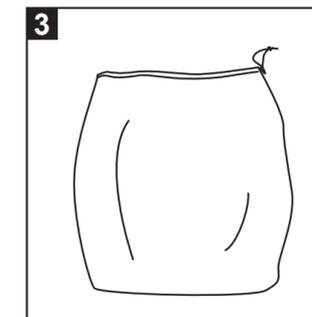

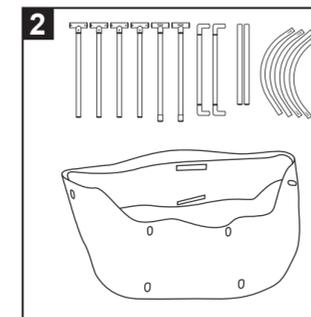

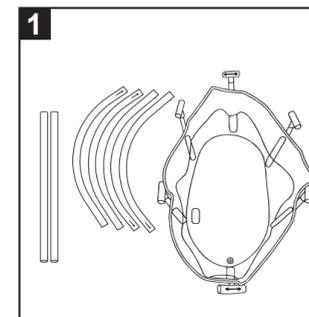

Straighten the upper end of the bathtub and fold it outward. Locate the hook and loop fastener at both ends and connect them with the external hook and loop fastener.

Install the drain valve and drain pipe, check if the water valve is closed, plug all the plugs, fill the cushion with water. Installation is now complete.
If you won't use this product for a short time, you can cover it with protective fabric cover and tie the cover straps to the aluminum rods.

Storage Method

Remove the protective fabric cover, open the water valve and drain all the water from the bath tub, find any one interface connector, hold the snap tab and disconnect the connection between the aluminum tube in both directions, remove all the accessories and store them in the storage bag.

Repair Instructions

If the product is damaged, please use the provided repair patch.

1. Completely drain the product.
2. Clean and dry the damaged area.
3. Carefully peel patch. Press patch over the PVC area to be repaired.
4. Wait 2 hours before use.
