Instruction Manual

SOS Personal Alarm Tracker
K: 43-719-594 | T: 72-466-131

MADE IN CHINA

Before use please read this manual carefully.
Please retain for future use.

Battery Safety Warnings:

- Do not expose the battery to extremely high or low temperatures during use, storage, or transportation, nor to low air pressure at high altitudes.
- Do not attempt to disassemble, modify, or replace the built-in lithium battery.
- Never dispose of the battery in fire or a hot oven, or mechanically crush or cut the battery, as this may cause an explosion.
- Do not leave the battery in extremely high-temperature environments, which may cause explosion or leakage of flammable liquid or gas.
- A battery exposed to extremely low air pressure may cause explosion or leakage of flammable liquid or gas.

Getting Started

- Exit transportation mode. Pull the latch to sound the alarm, then repull it. This will exit transportation mode and restore full alarm functionality.
- Check for Updates: To locate the safety alarm using Apple's Find My app, ensure you have the latest versions of iOS, iPadOS, or macOS. The Find Items app on Apple Watch requires the newest watchOS.
- Launch the App: Open the Find My app on a compatible iPhone or iPad. Enable app notifications.

(8) Fill the name

(9) Choose an Emoji

(10) Wait for

(11) Finished

Function Introduction

- Find Items** - Tap "Play Sound" to make your Alarm Tracker beep when it is nearby.
- Find your Item's location** - Your Alarm Tracker's last known location will appear on the map as emoji you choose during set up, tap "Directions" to navigate to the last known location.

Notifications

- Enable the "Notify When Found" toggle, when your Alarm Tracker's location is seen by another "Find My" enabled device, you will receive a notification of its updated location.
- Enable the "Notify When Left Behind" toggle, you will receive a notification when you leave your Alarm Tracker behind and it is no longer in range of your device.

Note: "Notify When Found" can only be activated when your Alarm Tracker is out of range.

Lost Mode

- When your Alarm Tracker is lost under "Lost Mode", tap the "Enable" tab, a screen calling "Lost Mode" will pop up, tap "Continue". You can enter your phone number or email address and tap "Next".
- You may enter a message that will be shared with the person that finds your Alarm Tracker.
- Tap "Activate" to enable "Lost Mode".

Note:

- When "Lost Mode" is enabled, "Notification When Found" is automatically enabled.
- When "Lost Mode" is enabled, your Alarm Tracker is locked and cannot be paired to a new device.

Enable SN:

- Enable SN: when the tracker is in lost mode, long press the SOS button, you will hear onebeep, indicate that the device's serial number (SN) has been transmitted to the Apple backend server.

Rename Item

- Name of the Alarm Tracker can be renamed.

Remove Item

- Make sure "Lost Mode" is disabled and click "Remove Item". After selecting the option, the system will pop up "Remove Item?" and click "Remove" to remove the device.
- The Alarm Tracker is now reset and ready to pair to a new device.

Share This Item

- Tap "Add Person" to share this Item.
- Tap "Continue" and select related people to share.
- Tap "Share" and wait for related people to confirm your invitation.

Others also can located this item. And tracking notification will be muted.

***Available for iOS 17 above version.**

System Requirements and Compatibility

- Apple ID.
- iPhone models with iOS 14.5 or later.
- iPad models with iPadOS 14.5 or later.

About the Find My App

The Apple Find My network provides an easy, secure way to locate the item using the Find My app on your iPhone, iPad, Mac, or the Find Items app on Apple Watch.

To use the Apple Find My app to locate this item, the latest version of iOS, iPadOS, or macOS is recommended. The Find Items app on Apple Watch requires the latest version of watchOS.

Factory Reset

- If the Alarm Tracker is not detected by your device, please factory reset the tracker first, then retry pairing.
- Press the button 4 times rapidly, then press and hold it on the fifth tap until you hear a ringing chime. Keep holding the button until the piercing alarm chime sounds, which indicates the factory reset has completed successfully.
- A reset operation is required to enable the device to enter the pairing state again (synchronization of Find My also requires simultaneous unbinding) and rebind the new Apple ID account.

How can I prevent my device from being used for malicious tracking

When someone else's device mixes with your belongings, and tracks it over a period of time, you will be reminded in below two ways:

- If you have an iPhone, iPad, or iPod touch etc Apple device, you will get alerts on your Apple device. This feature is available on iOS or iPadOS 14.5 version or above.
- If someone else's device finds its way into your stuff, your iPhone will notice it is traveling with you and send you an alert. After a while, if you still have not find it, the Alarm Tracker will start playing a sound to let you know where it is.

Important tips:

When pairing a device with Find My app, the phone will link to the Apple server. Pairing may fail because of network problems. The following action is recommended.

- Change the phone's network, such as switching between Wi-Fi and mobile. The first pairing may take a long time, please wait patiently.
- Reset your Alarm Tracker.
- When "Lost Mode" is enabled, DO NOT REMOVE ITEM in the APP. Your Alarm Tracker will be locked and cannot be paired to a new device.

Use of the Works with Apple badge means that a product has been designed to work specifically with the technology identified in the badge and has been certified by the product manufacturer to meet Apple Find My network product specifications and requirements. Apple is not responsible for the operation of this device or use of this product or its compliance with safety and regulatory standards.

To use the Apple Find My app to locate this item, the latest version of iOS, iPadOS, or macOS is recommended. The Find Items app on Apple Watch requires the latest version of watchOS.
