How To Make A Beaded Keyring

Thread beads onto the clear cord in your desired pattern or use the guide image for reference. Keep adding beads until you reach your desired length.

After threading the beads, take the end of the cord and go through the first 2 beads from the bottom to the top, as shown.

Take one end of the clear cord and thread it through the hole of the keyring. Tie a knot with the other end of the cord, as shown. Cut off any excess cord, leaving small tails. Tuck the small tails into the beads to hide them.

The beaded keyring is complete.
Repeat Steps 1–3 to make up to
2 more beaded keyrings.
