ALL-HOUSE SLIME INGREDIENTS

1 Tear open a slime powder packet and pour it into the cauldron.

2 Fill the **matching bottle** with **WARM** water up to the line shown.

3 Pour the water into the cauldron.

4 Add your mix-in!

5 Stir well with the wand for 30 seconds.

6 Transfer the prepared slime into the matching bottle and **close the cap tightly**.

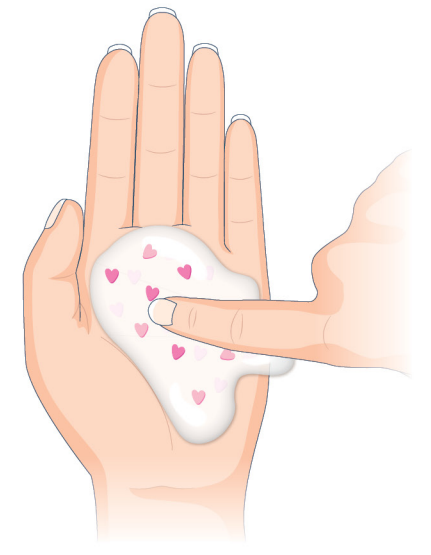

7 Let sit for 20 minutes.

If the slime is still too sticky, let it sit for an additional 5-10 minutes.

8 Have fun playing! Always store the slime in its bottle: close it tightly to help keep the slime squishy and ready to play with next time!

TIPS:

Wash your hands well before making slime.

Avoid using too much water: slime will become runny!

Protect your work surfaces and clothes: coloured powder may stain.

Slime may stick to and stain surfaces including wood, fabric, carpets, and hair.
Clean any slime residue with a mixture of vinegar and hot water: ask an adult for help!

Play with your slime regularly to maintain its texture.

Always store slimes in the bottles with caps tightly closed.
Keep in a cool, dry place, ideally between 15–20°C (59–68°F).
