These instructions are for your safety. Please read through them thoroughly before use and retain for future reference.

How to assemble:

1. Before you start to assemble your tree, place the tree stand on a level surface. Unfold the metal stands and make them perpendicular to each other.
2. Insert bottom section C into stand with screws provided, make sure it is tightly secured.
3. Insert the trunk end of the middle section B into the pole of the bottom section. (Different size of the tree may contains several parts of middle section)
4. Insert tree top A into the trunk and make sure the tab fits tightly into the slot in the tree trunk.
5. Open all the branches. Shape the branches, start with tips farthest from the pole, one to the right, one to the left and one at the centre of the main stem.
6. Wrap the end tip around the wire near the pole.
7. After shaping the whole tree following the previous steps, step back and take an overall look at the tree. Shift branches to fill any gap. Slightly upsweep all branch tips for a natural look.

Disassembly and Storage tips:

1. Save the carton.
2. Disassemble the tree by reversing the sequences stated in the assembly instruction.
3. In case of difficulty separating the tree poles (trunk), apply a small amount of lubricant at the joint and rotate the upper pole in both directions. Lift up the upper pole again.
4. Pressing branches against stem before removing the top to bottom section gently. Carefully replace the tree in its box and tape it shut. Store carton in a loose and dry place.
5. Do not put the tree direct under sunlight or in a damp area or an area where the temperature exceeds 40°C or 90°F.
6. Please save these instructions.
