4. Micro input for charging the portable charger's built-in battery
5. USB 1 output for charging electronic devices
6. USB1 sealed cap
7. Solar Panel
8. USB2 sealed cap
9. USB2 output for charging electronic devices
10. LED torch

Specifications

Battery Capacity: 5000mAh Li-polymer battery
Input: DC5V1A
Output: DC5V/2X1A
Product size: 142*75*15mm
Operation Temperature: 0~45°C

MADE IN CHINA

Operating Instructions

Charging the portable charger via the solar panel

Place the portable charger under sunlight.

The green LED indicator will on when the portable charger is being charged under sunlight.

When the portable charger is fully charged, the LED indicator light turns off

NOTE: portable charger only for emergency, please avoid prolonged exposure under the burning sun.

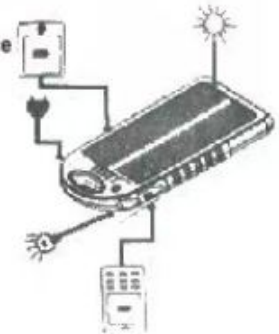

Charging the portable charger from an external power source

Connect the portable charger's cable to a computer or laptop USB port or USB AC adapter.

Blue LED indicators come on to indicate that the portable charger is being charged.

When the portable charger is fully charged, the LED indicator light turns off.

An external power source takes 5-7 hours to fully charge the portable charger.

Charging an external device via the portable charger

Check that the portable charger is adequately charged by pressing [ON/OFF]. The battery charge status is indicated by the LED.

1st LED indicator-Blue, 20% power

2nd LED indicator-blue, 40% power

3rd LED indicator-blue, 60% power

4th LED indicator-blue, 80% power

5th LED indicator-blue, 100% power

LED indicators will turn off after 20 seconds if fully charged

The portable charger needs to be fully charged if you wish to utilize both USB ports and charge two devices simultaneously.

NOTE: When the portable charger is in use and its battery charge level is very low, the portable charger will automatically shut off in order to protect its battery from a deep discharge. When the portable charge begins to recharge, it takes 3 minutes before it can output any charging current.

LED torch light

Double-click [ON/OFF] to switch the torch on and off.

Safety

Never attempt to open or dismantle the portable charger.

Never subject the portable charger to knocks or blows

Do not let children play with the portable charger.

The portable charger should never be immersed in water or any other liquid.

Do not leave the portable charger in a confined space that is open to the sun as this may cause the maximum overcharging temperature to be exceeded.
Do not dispose of in a fire.
