Crystal Growing Rainbow Kit

3+
years

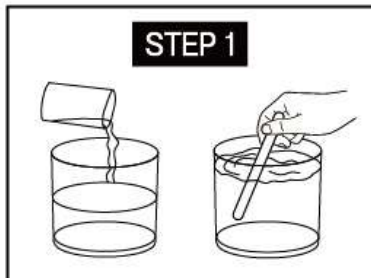

CONTENTS:

- 1 x rainbow plaster
- 1 x 150g crystal powder
- 1 x wooden stick
- 1 x brush
- 4 x 0.5g paint powder

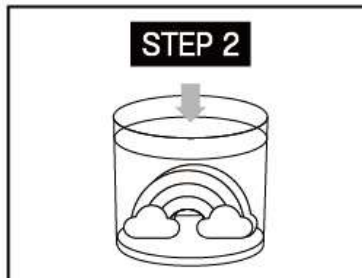

TIPS:

1. If the container is too large, your crystal powder will not come a crystal.
2. Make sure your rainbow plaster is totally submerged.
3. Overnight, a process called nucleation will happen - when all the molecules in your crystal powder come together to become a crystal. This fascinating process will make your rainbow look even more majestic in the morning.

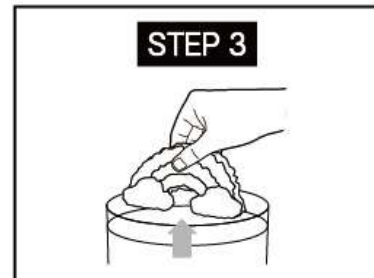

How To Mould

Ask an adult to help you pour your crystal powder and 300mL of boiled water into a container slowly stir for 3 minutes.

After letting your mixture sit, ask an adult carefully place your rainbow inside in an upright position. In a couple of hours, crystals will start to form - but be sure to let your rainbow sit overnight to get the full effect.

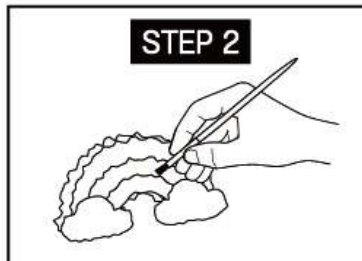

Once your crystals have grown, remove your rainbow from the water carefully and set to dry on a paper towel for 30 minutes or until completely dry on surface.

How To Paint

Pour 4mL of water into a paint pot and slowly stir until your paint powder has completely dissolved.

Dip your paint brush into the colour, and gently brush against the crystals to bring your rainbow's magic to life.

WARNING:
CHOKING HAZARD - SMALL PARTS.
NOT FOR CHILDREN UNDER 3 YRS.

ATTENTION: ALL ART MATERIALS LIKE PAINT, MAY CAUSE STAINS. ALWAYS PROTECT CLOTHES, CARPET, WORK SURFACE, FURNITURE AND OTHER OBJECTS. ALWAYS USE A PROTECTIVE COVER TO PREVENT STAINS.

CAUTION: RINSE EYES IMMEDIATELY IF THE PAINT COMES INTO CONTACT WITH THEM. IF IRRITATION PERSISTS, SEEK MEDICAL ATTENTION.
