Tie-Dye Kit

General Instructions

6+ years

•Add water.

1

•Apply dye.

2

•Wrap, let set 6-8 hours and rinse.

3

1 Wearing protective gloves, **1** add water to dye bottle, and replace cap tightly. Shake until dye is dissolved. Use full-strength for intense colours. For a lighter shade of colour, add more water.

2 Apply dye on fabric, checking to make sure dye has penetrated into folds. Do not over-saturate fabric. If dye is applied too close together, the colour may become muddy.

3 Cover dyed fabric with plastic wrap to keep damp. Let set for 6-8 hours, longer for a more intense colour. Rinse well with water until excess dye is removed. Wash and dry separately.

Read through all directions before beginning
Set up work surface
Protect your work surface with a plastic table cover or cover with a layer of paper towel.

Pre-wash fabric
For better dyeing, please wash the fabric first. Do not use fabric softener or dryer sheet. You can tie dye directly on wet fabric.

Tips:
1. Dye must be used within 45 minutes of mixing. Dye left unapplied after 45 minutes will begin to lose concentration and will result in noticeably weaker colour intensity.
2. Do not add water to dye until you are prepared to apply it.
3. Make sure excess dye dust is removed from work area.
4. Create new colours by blending dye.
5. Do not allow dyed fabric to rest with other items.
6. Always use gloves when working with dyes.

Various methods of tie dyeing

### HEADBAND

Pinch section of fabric.

Bind with elastic bands.

Apply dye to each section. Flip over onto clean surface and apply dye.

Pinch fabric into sections.

Bind with elastic bands.

Apply dye to each section. Flip over onto clean surface and apply dye.

ADULT SUPERVISION IS REQUIRED.
PRODUCT MAY VARY FROM IMAGE SHOWN.
PLEASE KEEP THE PACKAGING FOR FUTURE REFERENCE.
