

Halloween Candle Making Kit

Kit Includes

- › 385grams soy wax
- › 2 candle moulds
- › 40cm wick rope
- › 2 candle dyes
- › 1 wick holder
- › 2 wooden sticks
- › 1 needle

Tips

- Enough wax to make 1 skull and 1 ghost candle.
- Keep the mould still during the setting process to ensure a flat base on your candle.
- The wax in the centre of your candle will take longer to set, wait for the wax to dry completely before releasing mould. Take care when handling hot wax.
- Remove the candle from the mould very gently and slowly. Too much force can cause the candle to break in the mould.

How To Create A Halloween Candle

1

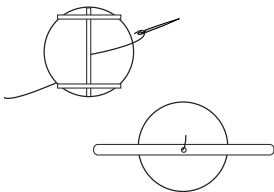

Add soy wax to a heat resistant container, heat and stir well with the wooden stick.

2

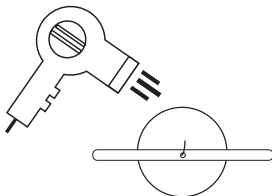

Once the wax is completely melted add small amounts of dye until you achieve your desired colour.

3

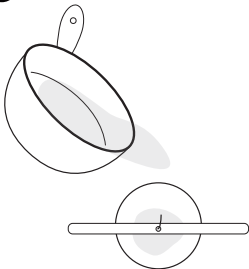

Thread the needle and wick rope through the top of the mould. With the opening of the mould facing upwards, place the wick holder on to stabilise the wick end.

4

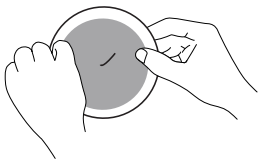

Blowing hot moulds with a hot air gun.

5

When the wax is at around 75°C, pour the wax into the mould in three stages, shaking the mould appropriately during the pouring process to reduce the formation of air bubbles.

6

Gently demould after the wax has completely dried to reveal your candle.
