#### **Hinger Adjustment Tips**

Noted: The door might be scraping, bumping, misaligned when first assembly.

Please follow the below tips:

Adjust the door up and down

- 1. Loosen the two mounting screws on both hinges, but only slightly. ...
- 2. Gently close the cabinet door.
- 3. With the door still closed, adjust the cabinet door to the desired height.
- 4. Open the cabinet door again, being careful not to jostle the door out of position.
- 5. Retighten the screws by hand.

Move the door in and out

If the door doesn't meet the box at the top, adjust the top hinge toward the cabinet and/or adjust the bottom hinge away from the cabinet. If the door is gapped at the bottom, do the reverse.

Move the door right or left

You can adjust one or both hinges on each door, depending on how much correction it needs. If the door seems to be tilting down to the right, turn the side-to-side screw on the top hinge so the hinge pulls closer to the side of the cabinet box, moving the top of the door to the left.
