FISHING FOR NUMBERS

CATCH A BUG

Players

1-2 players

Includes

- › 2 x Magnetic wooden fishing rods
- › 45 x Number magnets
- › 9 x Frog prompt cards (double sided)

Set up the game!

This game can be played together with two players. Spread out the number magnets facing up on a flat surface like a table or the floor. Each player picks a magnetic fishing rod. Set up the frog cards in a pile next to the magnets.

Let's feed the frogs!

The frogs are hungry! Use your fishing rod to catch bugs, insects and fish to feed the frogs. Each player takes turns picking up a frog prompt card and reads the fun challenge. For example, it might ask you to catch and count all the ladybugs! Use the magnetic fishing rod to catch all the ladybugs you can see, counting them as you go.

See how many of the frog prompt card challenges you can complete!

Other ways to play!

Instead of taking turns, work together to complete the challenges!

For a simple way to play you can create your own challenges! Take turns thinking of fun tasks for the other player. Think of tasks that include sorting and matching the colours, shapes and numbers.

For example, you could challenge them to catch all the blue bugs, or all the caterpillars. You could also try to catch matching numbers for example all the bugs with the number three!
