Small Fish Aquarium

K: 43-352-289 | T: 68-745-233
Capacity: 3L
Dimension: 22cm(H) x 15cm(W) x 15cm(D)
Input: USB 5Vdc
USB adaptor not included

Note:
- Suitable for one betta fish or 2-3 small/tetra sized fish. If using for betta fish, do not exceed limit of 1.
- A water treatment such as aquarium conditioner (not included), must be used when adding water to the tank. Read instructions on packaging for how to use.
- Do not add fish immediately into the aquarium after setting up. A minimum of 72 hours is required after aquarium conditioner is added. This 72-hour period allows for any chemicals and pollutants to be adequately dissolved in the water, along with producing good bacteria to grow in the tank.
- Rinse the tank and decorations (gravel, plastic deco, etc. not included) before use. Do not use soaps or detergents as these are harmful to the fish.
- Before adding the fish to the aquarium, float your new fish in the bag provided for an hour, so that the water temperature in the bag is the same as that in the aquarium.

Instruction:
- Choose a position away from direct sunlight and cold drafts. Too much sunlight can result in excessive algae growth in your aquarium.
- Fill the tank with water to 15mm below the top of the tank.
- Connect the USB plug to any idle USB port at home (USB adaptor is not included). To turn on colour changing LED, press the switch located on top.

Maintenance:
- Water health and colour will determine how often the tank requires maintenance. Generally, maintenance should be carried out every 2 weeks.
- Remove the fish with water taken from the aquarium. Clean the gravels and decorations (if any) and remove dirt, debris & fish feces. Put back fish and water taken from the aquarium.
- In the event of changing water, only change 25% of the water, and fill with tap water. Do not forget to add aquarium conditioner to the tap water.

FAQS
If the LED doesn't light up – Make sure the USB cable is plugged into the adaptor and is securely connected.
