

Paint Your Own Mug

Instructions

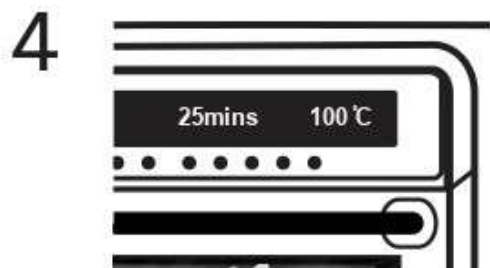

Clean mug with a cloth. Then paint on it with the paintbrush.

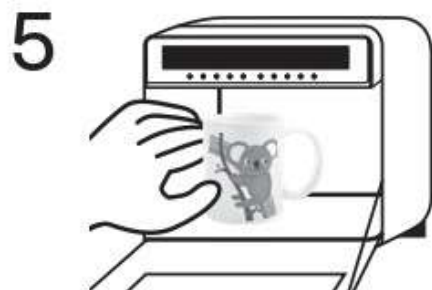

After you have finished painting, leave the mug to dry for 24 hours.

Place the mug in an oven (normal gas or electrical), but NOT a microwave.

Heat the mug in the oven with the temperature of 100°C / 212°F for around 25 minutes. Do not take it out immediately.

After cooling off, take the mug out of your oven.

Your mug is now complete!

PREPARATION:

1. Wear a protective apron at all times.
2. Refer to the packaging box as inspiration when painting, or create your own design.
3. Use newspaper or a protective cover on your work area before you start painting.
4. Keep the paint lids closed after use.
5. Thoroughly wash the paint brush with water after each use and before dipping it into another paint tub.

CAUTION:

1. Before you place the mug in the oven, ensure it has dried for 24 hours after you have finished painting. Paint colours will be dull if it is not completely dry.
2. Ensure to let your mug cool down before removing it from the oven as it will be very hot.
3. Only use a normal gas or electrical oven, NOT a microwave.

TIPS:

1. Add a couple of drops of water to the paint if it looks dry or sticky.
2. Mix different paints together to create new colours.
3. If you make a mistake when you are painting, just wipe the paint off by tissue or wash the mug. However, the paint cannot be washed or wiped off easily after baking.
4. Allow the mug to cool completely before use.

NOTE:

Mixing Blue and Yellow will make a close shade to Green.

Mixing Red and Blue will make a close shade to Purple.
