

Set-up Instructions:

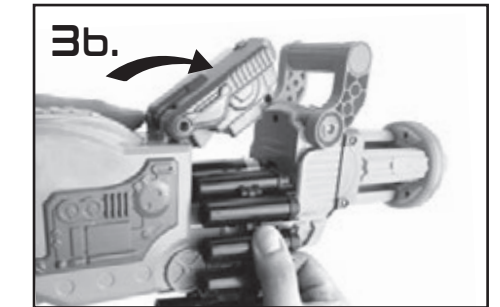

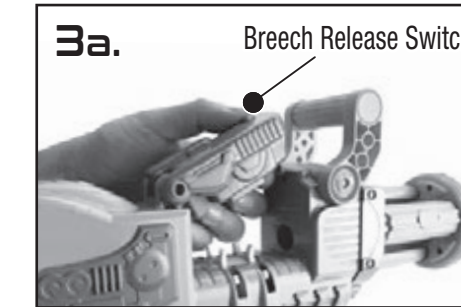

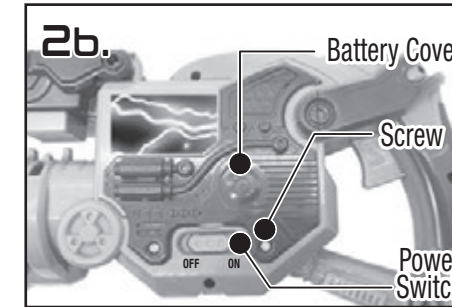

1.Loading Darts

- Your ammo belt comes in a loop and has 22 cartridges. The first and the last are dummy cartridges. Each dummy cartridge is marked with an orange label.
- Insert the foam darts into the open/empty cartridges. Ensure that each foam dart has been pushed in all the way.

2.Loading Batteries

- Move the power switch to the "OFF" position.
- Loosen the screws with a Phillips/cross-head screwdriver(not included).
- Lift the cover; and insert 6x1.5V AA batteries (not included). Follow the polarity directions (See diagram).
- Close the battery cover and replace the screws.

3.Loading the Ammo Belt

- Pull back on the Release Switch on top of the Breech Cover. Lift the Breech Cover. Drop in the ammo belt and position the dummy cartridge (with the arrow) directly in line with the firing nozzle.
- Ensure that the directional arrow is facing forward.
- Securely close the Breech Cover.

4.Power On

- Push the Power Switch to the "ON" position.
- Press down on Trigger to fire darts.

Trouble Shooting:

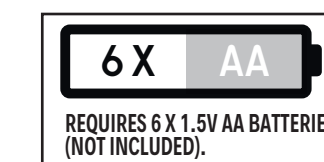

Problem	Suggestion
Pressed Trigger; No Response	•Check that batteries have been inserted in the correct polarity.
Pressed Trigger; Motor moves; but does not fire	•Check that the Darts have been inserted all the way to the rear of the Cartridges.
Darts travel only a short distance	•Replace the batteries. •Rapid depressing and releasing of the trigger does not give sufficient time for the motors to spin. Hold down the trigger for a longer period.
Gatling jams during firing	•Turn the Power Switch to the "OFF" position. •Lift Breech Cover. •Remove Ammo Belt by lifting the rear end upwards. Retrieve jammed Dart. (Jerking the Ammo Belt sideways will damage the Darts.) •Reload and replace Ammo Belt.
After forcibly stopping the front barrel from spinning, the Gatling does not function	•This is a built-in safety feature. Release Trigger. Move Power Switch to "OFF" position. Wait 30 seconds for the motor to cool down. Move Power Switch to "ON" position. Resume play.
Ammo Belt does not rotate	•Check that Ammo Belt has been positioned correctly in the drive gear.

Battery Safety Information:

- Batteries are to be inserted with the correct polarity and always follow the product and battery manufacturers' instructions.
- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc), or rechargeable batteries.
- Only batteries of the same equivalent type as recommended are to be used.
- Do not use RECHARGEABLE batteries, unless specified.
- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the product before being charged (if removable).
- Rechargeable batteries are only to be charged under adult supervision (if removable).
- Always remove exhausted or dead batteries from the product.
- Remove batteries from the product before storage.
- The supply terminals are not to be short-circuited.
- Batteries may explode or leak if misused.
- Battery/Batteries should be installed by an adult only.
- Dispose of batteries responsibly. Do not dispose of in fire.
- AA/LR6 Batteries may present a choking hazard.
- Keep away from young children.

WARNING:

- Not suitable for children under 3 years of age. Small Parts. Choking Hazard.
- Do not aim at eyes or face.
- Do not launch at self or animals.
- Do not look directly into the barrel.
- Do not use damaged or modified darts.
- Do not modify this product or any of the included components.
- Do not use projectiles other than those supplied with this product.
- Colours and contents may vary from items shown.
- Remove all packaging before giving this product to your child.
- Please keep packaging for future reference.
