8. 50cm length of candle wick x 1

EXTRA ITEMS YOUR WILL NEED

- › Plastic sheets to protect your work surface
- › A stovetop and heat safe dish or saucepan to heat the wax
- › Scissors

CREATING A TOTEM CANDLE

Makes 1 Totem Candle

Tips:

Read through instructions before starting.

1. Take out the metal needle, thread the candle wick through the end of the metal needle, then use the tip of the needle to penetrate the center of the base of the silicone mould. Please reserve 5-10cm of the candle wick at each end of the silicone mould. (Fig. 1-3)
2. Thread the candle wick which is positioned at the top of the silicone mould through the middle of the supplied wooden candle wick holder. Ensure that you place it tightly in the middle of the silicone mould (Fig. 4)
3. Put on the supplied disposable gloves and begin making your candle.
4. Pour soy wax and beeswax in a heated dish at a ratio of 1:1 and stir with the wooden muddler. Heat mixture until completely melted. (Fig. 5-6)
5. After ensuring there are no bubbles present in the wax liquid (Note: you can use a thermometer to measure the temperature of the wax liquid, which needs to be heated to 70-80 degrees Celsius,) pour into the mould slowly. (Fig. 7-8)
6. When the wax liquid is about to reach the top of the silicone mould, ensure that you leave a gap of 1-2mm between the liquid and the candle wick holder to avoid uneven modeling. (Fig. 9)
7. Wait 4-5 hours until the wax has completely hardened, remove the candle wick holder, then gently peel back the silicone mould to reveal your candle. Cut any excess wick. (Fig. 10-12)
