- › 1 x wick
- › 1 x wick holder
- › 1 x glue dot
- › 3 x wax dyes
- › 3 x wooden sticks
- › 1 x instruction sheet

Guide Image

Tips

- › Keep the jar still during the setting process, ensuring the bottom of the candle is flat.
- › Pour the wax into the jar in three stages. Tap the jar during the pouring process to reduce air bubbles.

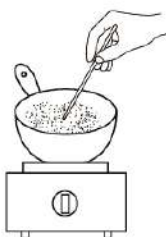

How To Make A Succulents Candle Jar

1

Secure the wick on the base using the glue dot. Place the wick holder on top of the jar and secure the wick in place.

2

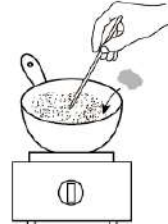

Add 340g soy wax to a heat resistant container, heat and stir well with a wooden stick until all wax is melted.

3

Cool the wax for a few minutes, then pour it into the jar. Fill the jar until 3/4 full. Allow the wax to set completely.

4

Add some soy wax and melt as per step 2. Add wax dye colour chips and stir well with the wooden stick until the dye has dissolved completely.

5

Cool the wax for a few minutes, then pour it into the succulent mould and wait for it to cool completely.

6

Repeat steps 4 and 5 to pour wax into the second succulent mould. Wait for the wax to cool completely before demoulding. Make around 11 succulents in your desired colours to fill the candle.

7

Before the candle fully dries, add the succulents to secure to the top and press firmly. Then your candle is ready to use or display.

MADE IN CHINA
