

Instruction Manual

Read the following instructions carefully before using the lounger:

Step 1 - Lay lounger upside down.

Step 2 - Pull legs outward until locked

Tip - You'll know they are locked when they do not easily fold back or close.

Step 3 - Turn the longer over to stand upright

WARNING - Make sure the legs are fully extended and locked. They should be angled outward before use.

Step 4 - Unbuckle the straps.

Step 5 - Open the top and bottom sections fully so the lounger is flat. Then rotate the latch downwards to ensure it is locked into place.

Step 6 - Lift the top (head) section until it locks into position. To adjust to a different position, fully lower it, then raise it again to the desired position.

Made in China

CAUTION:

1. Lounger holds maximum of 100kgs.
2. Keep fingers away from hinged areas of lounger.
3. Make sure the legs are fully extended and locked.
4. Only use with one person at a time.
5. Avoid sitting on either end. Only sit on the middle section.
